A New Dock at Tolego.—The Tolego Blade says that the Toledo, Wabash & West ern Ballway Company have recently com-pleted the rebuilding of their immense dock in the vicinity of the Freight House and Grain Elevators. About 389 feet in front of the former house has been entirely re-built, including the bulkhend, and it is the built, including the bulkhead, and it is the most substantial on the river front. The timbers composing the bulkhead were framed and botted and sunk in the bottom, of the river, with braces extending under the house and there framed and botted, rendering the whole as solid as it could be made. If the floor has been relaid with new plank, and a better floor it would be difficult to construct.

The source space between the Freight House and Grain Elevators has also been decked over. The bulkhead was constructed in the same manner as that portion mentioned above, and the dock planked in the same way. This dock is about 500 feet long, and with the exception of a short distance—say 100 feet—in 110 feet wide.

This Company have now a dock, including that in front of the Dievators, of over 2,000 feet in length, and a better line of dockage is not to be found on the entire lake shore.

We notice that the room in the savard. AMERICAN HOUSE.

FRIDAY EVENING, May 17, 1846. The gold market to-day was steady, and very little change was made in the premi im, the price closing at 130@1301. The Tressury sold to the amount of a million and a half at the outside figure. It is expected that the shipment to-morrow will be about three millions, making a total of over six millions for the week. Foreign Exchange ontinues quite firm, though the rate to-day was a shade off, being quoted at 1000, which is barely at the specie shipping point. It is not probable gold shipments will be continued upon the extensive scale of this week, which is the largest ever before known in a single week.

Government securities to day were firm-er in New York, and there was an improved feet will find an article of Buckskin Gaiters activity in the demand. There is no good reason why the national bonds should be THE READY PAY SYSTEM—THAT IS WHAT
THE MATTER IS.—I am determined to make least as the money market remains as at present. Europe will not probably send back more of our securities than can be readily absorbed at full prices, if for no other purpose than the safe employment o capital.

In the local money market there is at present only a moderate demand for loans, but depositors are checking quite freely, and with most of the banks balances are steadly yielding. The general report is that the market is close for currency, and working tighter. Eastern Exchange continues close

and firm at the regular rates.

The great and growing ease in money at N. Y. is holding out a strong invitation to stock speculation, and combinations and cliques to put up prices are in process of organization. ing are well defined. In the general markets to-day business In the general markets to-day business was quiet, and prices ruled substantially as previously reported. We heard of no considerable transactions in Flour, and there is nothing doing beyond the trade demand— Wheat is firm for choice qualities, but in only moderate milling demand. Milwaukee spring is steady at \$2,10 for car lots—
Corn is quiet, but firm. Oats are dull, but steady and unchanged. In the Provision line prices continue firm, but trade is rather quiet. Batter is without demand and mainly nominal. Cheese is steady and firm. Eggs are in good request, scarce and better. Potatoes continue firm, and the demand is fully maintained. Petroleum is in Ises inquiry and hardly so firm.
